

Zero Code Integration, AI-first Automation.

Growing businesses that sense the need to bring in AI tools and unify their tech stack—quick and code-free.

50% More Cost Efficient

5X Faster Time-to-Value

100% Data Consistency

Why MakeWebBetter Connect?

Disjointed systems. Messy data. Manual workarounds.

As businesses scale, managing platforms at multiple fronts leads to chaos, delays, and missed opportunities, which in turn interrupt momentum.

Intelligent Automation to rid you of data chaos.

Reducing friction in data orchestration through Intelligent Automation. Build complex, no-code integrations and automate cross-platform actions with AI-assisted tools.

An AI-driven Automation Solution for you!

Feature-set: Intelligent, Reliable, Scalable

No Code Integration Platform

Deploy AI-driven automation to connect apps, the no-code way, through smart workflows & actions.

200+ Prebuilt App Connectors

Integrations that take only minutes to set up, giving you clean, consistent data—everywhere.

Built-In Error Handling & Retry Logic

Real-time error logs, conflict resolution, and retry mechanisms for reliable AI-first automation.

Workflows For Data Orchestration

Zero technical drag for advanced data transformation—mapping, conditional logic, & approval.

iPaaS with Native HubSpot Logic

Dedicated HubSpot Connector to centralize data in the smart CRM through 60+ actions.

Ready-to-use Workflow Template

Utilize or repurpose flow templates to keep your data automation efficient and foolproof.

AI-assisted & Intelligent Automation

Integrate Open AI, Claude AI, and your preferred AI tools. Leverage AI-driven automation and actions.

Cross-platform Integration

Multi-source syncing across tools with precision—AI, BI, finance, support, storage, etc.

Secure & Scalable

All your data is encrypted, even the credentials. Deploy controlled access to a multi-member project with permissions.

5 Steps To Go Live

Testimonial

With MakeWebBetter Connect we were able to seamlessly connect our HubSpot quotes to quickbooks online account. It allows us to sync invoices, payments, and inventory. Without it we would probably be forced to use a different platform as HubSpot would not have functioned to our needs.
